RE: Certification of Software Compliance with Sherman Antitrust Act and FTC Rules

We hereby certify under penalty of perjury that the Enterprise Profit Management solution ("RealAccretive") developed by F9Analytics strictly complies with all legal requirements of the Sherman Antitrust Act (15 U.S.C. §§ 1-7).

Furthermore, we certify that the software eliminates the necessity for deceptive rental fee practices under FTC Proposed Rules.

In aggregate, the software's ring-fenced deterministic logic identifies optimal prices unique to the individual investor; inclusive of expenses, incentives, and cost-of-capital, thereby eliminating the architectural design flaws that instigate non-competitive and non-economic pricing schemes.

The software supports fair competition by preventing anti-competitive practices and fostering an environment where businesses can compete on the merits of their products, services, and operational investment expertise.
